
Statement from Richard Gage, AIA

Founder, Architects & Engineers for 9/11 Truth

Welcome to our Pre-Release Edition of “9/11: Explosive Evidence – *Experts Speak Out*” – where we are partnering with you to complete this important film with sufficient quality to maximize its effect in informing and enlightening professionals and the general public worldwide about this critical evidence regarding the destruction of the three World Trade Center skyscrapers.

AE911Truth is encouraged by the excitement surrounding this new milestone documentary. Now is the time for *all* responsible professionals to speak out about the scientific forensic evidence that has been hidden and distorted by officials tasked with reporting the facts – yet discovered and disseminated by thousands of truth seekers around the world with no axes to grind.

Architects & Engineers for 9/11 Truth now number over 1,500 technical and building professionals, 43 of whom are doing just that in this film – speaking out about the deep flaws in the official story.

This is a time that calls for courage – and we applaud these professionals for their bold choice to participate in this documentary.

The film was inspired two years ago by our video team member, Marty McGee of Buffalo, NY, who pressed forward with this vision by flying around the country on a 24-stop route to videotape the experts.

Over one hundred hours of remarkable testimony was distilled into this documentary. However, we've already posted a dozen full-length interviews on our website and plan to publish them all for you by the end of the year.

Our film editors Francis Battaglia, Chuck Smith, and Mike Green have scrupulously worked the edited transcripts of the interviews into the refined video narrative. Their work is not yet complete – and *you* can help. In addition to the credentialed technical professionals who speak so clearly about the evidence, we have also asked experts with understanding of the human mind to assist us with their insights into the psychological issues confronting those who are facing the disturbing implications of the 9/11 evidence. This section of the film should be quite helpful in your personal attempts to inform your family, friends, and colleagues. The Pre-Release Edition does not yet include this key section’s powerful supporting imagery. Stay tuned for the final release in October.

Family members of 9/11 victims provide a moving conclusion with their heartfelt calls for a new investigation.
This new documentary differs substantially from our “9/11: Blueprint for Truth” DVD, which has been a mainstay for years in presenting the WTC evidence. No longer is it just “Richard Gage, AIA” presenting in seeming isolation. I am now joined by dozens of highly credentialed technical professionals. And the calls for justice from family members put to rest the objection that our work offends them, and should help melt the denial of this evidence in even the most hardened observers.

This Pre-Release Edition brings our effort to the point where we invite your constructive feedback to help us complete this important work. We are very interested in your comments on content, length, editing, music, photos, video, and missing graphics. Is there too much repetition? Which crucial points have been left out? (Note that we cannot record additional interviews or add to the ones that we have.) Please comment at 911ExpertsSpeakOut.org.

We found that a film like this cannot be completed with only an all-volunteer team. Services and fees are involved, and we need your financial support to carry us through the final phase. The DVD and online sales cover only a portion of the costs incurred in this enormous effort. If this film inspires you, please make your tax-deductible donation today to AE911Truth – a tax-exempt nonprofit 501(c)3 educational charity. Every penny counts! Please visit us online at AE911Truth.org.

We hope that you enjoy the documentary, and that you will show it to as many people as you can during the 10th Anniversary of 9/11, and beyond.
